

Stainless Steel 330 Mesh

Stainless Steel 330 Woven Wire Mesh

Stainless Steel 330 Expanded Metal

Stainless Steel 330 Perforated Metal

Commercial grade of stainless steel 330 mesh is widely used in the industrial market, given its strength and firm quality including the corrosion resistance that make it useful in chemical, food and drinks, mining, refining, healthcare, architectural, automotive, security, pharmaceutical and environmental applications. Get Stainless steel 330 mesh for your entire screening, filtering and sorting applications.

Stainless Steel 330 Mesh Applications

- Belt packs, bushfire protection
- Bird aviary mesh
- Reinforcing mesh
- Machinery or guard mesh
- Cat enclosure mesh
- Rodent mesh
- Food processing
- Drying
- Screening and sieving
- Fly screen and security mesh
- Roof safety mesh
