

## Strainer Basket

Strainer Baskets are used in the filtration applications where the lines can be shut down for a while to clean or change baskets. We produce standard pipe line strainers in the highest quality offering the following features:

1. Least pressure drop
2. Compact size
3. Fit in tight areas
4. Economical choice for moderate pressure based operations
5. Construction Material- Stainless steel, nickel, Inconel, Incoloy, Hastelloy, Monel, Nichrome
6. Adequately sized to meet any application and size needs
7. Ultra low discharge technology offers decreased removal volume
